(Start of Belt #19)

and beer the last session, this particular bill at this last minutes here, I think the Senators ought to know exactly what is taking place, and it is not that simply and not that rushed and I think we are making a grave mistake that if you go home from here today and pass this bill on over without some further thinking into this and I would have to opposed Senator Carpenter who is going to speak next and also Senator Fellman, because this begins the real do-gooders program and this is very controversial and I hope the Senators realize that when they get a next, when that bottle of beer goes up 5¢ to 10¢, when you push this button, you are going to be the one responsible for it.

PRESIDENT: Senator Carpenter.

SENATOR CARPENTER: Let's move the bill over and let's have the discussion on select file as we originally started out to do. At that time, I'll take care of Senator Mahoney.

PRESIDENT: Our problem is, we think we have to adopt the committee amendments at this point.

SENATOR CARPENTER: All right, I move the adoption.

PRESIDENT: Well this was an amendment to the committee amendments. Was one of the problems.

SENATOR CARPENTER: All right, let's adopt it too.

PRESIDENT: All right, we have the Fellman amendment. Senator DeCamp, for what purpose do you rise? We have the Fellman amendments to the committee amendments.

SENATOR DECAMP: Mr. President, members of the legislature, I'd opposed the Fellman amendments. The committee, I had this bill last year and then we turned it over to the committee and the committee spent an entire year and a summer studying it and we came up with, with the package you have in the Fellman amendments, right off the top of our head, will double or just change the whole picture. I just think they are dangerous to adopt. Stick with the committee amendments, let's go from that.

PRESIDENT: Well, the chair, we don't have to adopt the committee amendments to advance the bill. Now would you be willing to forget it, or stand by on the amendments and the Fellman amendment in order to advance the bill, in order to take it up on select file? Senator Fellman, do you agree to that? All right, Senator Luedtke, are you in agreement with that too?

SENATOR LUEDTKE: The committee amendments should be adopted? That is the bill.

PRESIDENT: He has an amendment to the committee amendments. The committee amendments can be adopted on select file.

SENATOR DECAMP: The committee amendments constitute the major bulk of the bill. I think we have to get them---

SENATOR CARPENTER: Let's move it over and argue about it on select file.

PRESIDENT: Why don't we just hold Senator Fellman's amendment over there until select file, and we'll take up the committee amendments then. Is that all right? Senator Richendifer for what purpose do you rise? Senator Richendifer? Pardon me sir?

SENATOR RICHENDIFER: No that is not all right. I've got some amendments that I want adopted and I don't want to have to get 25 votes to do it.
